

# Transformer Turns Ratio Tester TRTC Verification Calibrator

- TRT series accuracy verification
- Instrument troubleshooting
- Measuring ratio ranges 1 - 4800
- Accuracy 0,2 %
- Test voltages: 1 V –  $250\sqrt{3}$  V

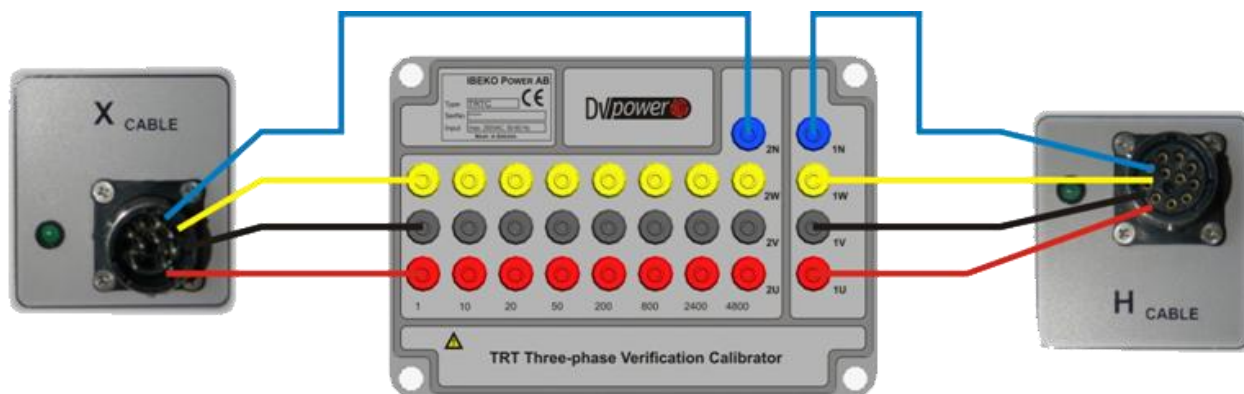

## Description

The TRTC Verification Calibrator has been designed for use as a reference transformer for the verification of the accuracy of the Three-phase Transformer Turns Ratio Tester TRT. The TRTC Verification Calibrator is available for both single-phase and three-phase test. It is also useful for troubleshooting of the instrument connected.

## Ratio ranges

The standard ratios controlled by TRTC are: 1, 10, 20, 50, 200, 800, 2400 and 4800.

## Connections

## Dimensions and Weight

- Dimensions (W x H x D) 255 x 250 x 121 mm / 10,04 x 9,84 x 4,76 inches
- Weight 2,5 kg / 5,5 lbs
