INTRODUCTION

The DV Power “Everything that’s good to know” free of charge training course provides engineers the opportunity to learn how to use DV Power circuit breaker test equipment and the DV-Win software. During these 3-day hands-on workshops, participants will have the opportunity to learn how to fully utilize DV Power Test Equipment.

Training is tailored for power system engineers with beginning, intermediate, and advanced levels of expertise. Training is also an opportunity to exchange experience with others, work with the latest DV Power test sets in the field of transformer, circuit breaker and battery test equipment. Get basic information on preparing a test procedure and analyzing test results more efficiently.

LANGUAGE

English

TRAINING TOPICS

- Theory of the circuit breaker testing
- Timing and Motion Measurements
- Contact Resistance measurement
- Dynamic Resistance measurement
- Minimum trip voltage test
- Creating a Test Plan
- Results analysis

INSTRUMENTS FOR TRAINING

- [Circuit Breaker Analyzer & Timer CAT66](#)
- [Coil Analyzer SAT40A](#)
- [RMO-G Series Micro ohmmeters](#)
- [Circuit Breaker Analyzer & Timer CAT-P](#)
- [Handheld Micro Ohmmeter RMO-H](#)
